

A decorative horizontal bar at the bottom of the page, divided into four sections with different colors and patterns: blue with white wavy lines, pink with white wavy lines, orange with white wavy lines, and dark blue with white wavy lines.

Revolutionizing Patient Access for Complex Therapies

CoverMyMeds' new technology-driven patient services platform makes human intervention an exception - transforming access, adherence and time to therapy outcomes for patients and providers.

Once you've decided your patient is clinically eligible for SYNAGIS® (palivizumab), start therapy by following the instructions to our patient services platform below:

- STEP 1:** If a transition of care (TOC) form has been submitted to the program, you will receive a notification to initiate a Universal Enrollment and Prescription Form (UEPF) within CoverMyMeds.
- If you don't have a transition of care form, you can submit a UEPF separately within CoverMyMeds or via faxed paper form.
- STEP 2:** Log into your CoverMyMeds account at www.covermymeds.com and toggle to the Cases Dashboard to find the UEPF that has been started for the TOC initiated patient or for your open UEPF patients. You can also start a new UEPF in the Cases Dashboard.
- STEP 3:** Complete and submit the UEPF, along with the patient's consent authorization, through CoverMyMeds. This triggers a patient support coordinator to complete a benefits check, review patient financials for patient assistance program, conduct prior authorization (PA) requirements, along with gathering consent, if not already captured.
- STEP 4:** When PA requirements are determined, the PA request will be shared into the patient's case within CoverMyMeds portal for you to complete and submit.
- STEP 5:** At the time of PA request submission, if the patient requested copay assistance on UEPF, CoverMyMeds will begin the copay enrollment and consent processes, if needed.
- STEP 6:** Once activities within the patient's case are completed, therapy can be triaged to the dispensing pharmacy, if applicable.
